SUMMARY

Passionate and driven Software Engineer with a keen interest in developing innovative solutions and contributing to cutting-edge technology. Proficient in various programming languages and software development methodologies, I bring a strong foundation in designing and implementing software applications. My problem-solving skills, coupled with a meticulous attention to detail, allow me to create robust and efficient code. I am committed to staying current with the latest advancements in software development and continuously expanding my skill set. Seeking a challenging and dynamic opportunity to apply my expertise in crafting high-quality software solutions and contributing to the success of a forward-thinking organization.

EDUCATION

Postgraduate Certificate in Software Engineering Technology
Centennial College, Ontario, Canada   **September 2023 - Present**

Bachelor of Science in Information Technology
Amity University, Tashkent, Uzbekistan   **September 2019- July 2022**
CGPA: 7.66/10

RELEVANT COURSEWORK

Operation System Concepts, Network Basics, E-governance, Data Structures Using C, Digital Electronics and Computer Organizations, Advanced Database Concepts, Object Oriented Programming Using Java, Python Programming, Internet of Things, Cyber and Information Security, Fundamental of Cloud Computing & Enterprise, IT Project Management, Unix Operating System and Shell Programming, Date Warehousing and Mining

WORK EXPERIENCE

Software Engineer - Voxe Media Group, Tashkent, Uzbekistan   **November 2021 - August 2022**
- Completely automated the data parsing and data scripting by integrating Selenium.
- Implemented scalable microservices of fast-growing all-in-one streaming applications using Go, gRPC, and MongoDB.
- Continuous Integration/Deployment Pipeline Integration, pull requests, unit testing.

Software Engineer Intern - Rounded LLC, Tashkent, Uzbekistan   **April 2021 - August 2021**
- Debugging and testing code.
- Collaborating with senior leaders.
- Implementing different microservices of automation of trade and business processes application development(Javascript/Typescript/Node.js).
- Researching, investigating and fixing a wide range of technical issues.

CORE SKILLS & TOOLS

Operating Systems: Microsoft Windows, Ubuntu Linux
Databases: MongoDB, PostgreSQL, Oracle SQL
Cloud Service: AWS
Programming Languages: C, Golang, Java, Javascript
Othesr: Virtual Box, Docker, CI/CD, Jest, Unit Testing,Git, Microservices, gRPC

WORK PROJECTS

[VoxeTV](#)

- Developed Golang scripts to use in the payment system.
- Implemented image optimization service, and increased delivery speed by 5 times to clients.
